Local & General

Mrs. Sigal and family are spending the week in Calgary.

Mrs. Lamont and Mr. and Mrs. Dobbs of Vulcan, are holidaying at Banff.

Mr. and Mrs. Elwood Granlin are spending a week at the home of Mrs. Granlin's parents near Red Deer.

Jimmie Brown, who has been attending school in Calgary, is spending the holiday visiting at the home of his father, Mr. J. Brown.

Big Prizes given away FREE during the Western Biscuit and Candy Week. See Campbell's Windows for Special Display.

Joe Brown, brother of Mrs. J. F. Harper is visiting at the home of J. Harper.

F. Caldwell and family motored to Browning Sunday, where they will leave Mrs. A. Caldwell and Betty to spend the holiday visiting relatives there.

Raspberries, Blue Berries, Strawberries and Cream, at Campbell's.

Don't forget the Elks Basket Picnic on Wednesday, July 10, at Bar U. Everybody welcome. Tea and coffee served free. We'll be seeing you.

Miss Nina Starr of Calgary is a guest at the home of Miss Kate Pharis.

Now is the time to fix that Combine or Tractor. Jim Lobban does it at your farm.

Mrs. Freeze was a dinner hostess on Friday evening when her guests included Mr. and Mrs. W.K. Anderson of Kenton, Manitoba, Mr. and Mrs. J. McLeod of Hawlf, Alberta and Mr. and Mrs. Geo. Campbell.

Mr. and Mrs. Hugh Frame and Alex of Brant, left last week to spend a holiday at the home of Mr. Frame's mother at Killarney, Manitoba.

Mr. and Mrs. W. K. Anderson now of Kenton, Manitoba, and Mr. and Mrs. J. McLeod of Hawlf, who have been holidaying at Waterton Lakes, renewed acquaintances in Champion Friday.

Dr. Freeze attended a clinic in St. Michael's hospital last week, at which Drs. Day and McPherson of Edmonton lectured. The former's subject was obstetrics and the latter's fractures. Dr. Freeze spoke highly of the clinic.

Mr. and Mrs. W. J. Maxwell and Mr. and Mrs. Geo. Brown of Dunville, Ontario spent a few days visiting at the home of Mr. and Mrs. R. A. Maxwell this week. The party are en route to the Peace River country.

Among Stampede visitors this week were: Mr. and Mrs. J. Anderson, Mrs. W. E. Williamson, Mr. and Mrs. Guy Voisey, G. M. Campbell, Milt Moffatt, Mr. and Mrs. Alexander, F. Puzey, G. Dow, Herb Williams and Mr. and Mrs. F. Caldwell.

Now is the time to fix that Combine or Tractor. Jim Lobban will do it at your farm.

Mrs. A. Diemert is visiting in Lethair, Montana.

Mrs. Farmer left Sunday to spend a week visiting friends in Calgary.

Several from Champion are taking in the Stampede in Calgary this week.

I. Granlin and Slim Bissett were Lethbridge visitors this week.

Mr. and Mrs. F. J. Clapp were Lethbridge visitors on Thursday.

Miss Mary Zang of Vulcan is a guest at the home of Mrs. A. Nelson.

Mrs. J. Cook, who has been seriously ill, is making progress towards recovery.

Mrs. Campbell and Miss Rheta Campbell were Lethbridge visitors Tuesday.

Miss May and Pauline Fisher are guests at the home of Mr. and Mrs. Edwin Fisher this week in Calgary.

Miss Florence Ulrich, who underwent a operation in the Vulcan hospital recently, is convalescing at her home.

Rev. Dawson and family left Monday for Calgary.

Mr. and Mrs. Bastin and family are camping for a week at Willow Creek.

W. C. Fry passed through Champion on Tuesday on his way to Calgary.

A. Kramer and W. Diemert motored to Lethbridge Tuesday returning with a new Chevrolet truck, for the Vanbesin mine.

Friends of Miss Helen Beazley will be pleased to learn that she has recovered sufficiently from her recent operation to return to her home.

J. Miller and family left on Monday for the Peace River country.

Mrs. U. D. Smith and M. Smith accompanied by Miss Vera Smith and H. Smith of Hartley, are Waterton visitors this week.

Mrs. Gray of Vancouver is a guest at the home of her sister, Mrs. J. Cain.

Order Now! Preserving Cherries, Binges, Royal Ann, Tartarians and Pie Cherries at Campbell's.

A large number from Champion and district attended the Stampede at Carmangay on Friday. They report an immense crowd.

Mr. and Mrs. George Baillie spent a few days in Calgary, taking in the Stampede.

Mr. and Mrs. Alex McDougall are in Calgary this week, where Mr. McDougall has several head of cattle entered in the show there.

Just Arrived. A Smart Range of Men's New FELT HATS, latest Color and Style, from \$2.25 to \$2.65 at Campbell's.

Just opened at Campbell's, a new stock of Fancy Crockery, nice for gifts, priced from 25c to 95c.

Mr. and Mrs. Clarence Davis and Miss Blanche Schooley are Calgary visitors this week.

Horses entered by McLeod and Williamson at Vulcan, Clearholm and Carmangay were successful in winning many prizes.

A full cement basement and interior alterations have considerably added to the home now occupied by E. Weiss. A coat of stucco will be added in the near future.

Farewell Party

Pat Kimmitt, who for the past six years has been running the Ogilvie Elevator at Travers, having been transferred to Bow Island, was given a farewell party at J. E. Rod's, such as seldom given a grain buyer by the farmers, who arrived by car, horse back and Bennett wagon and the gathering numbered over three hundred, all laden with cakes, sandwiches and ice cream freezers.

After three ball games had been played to the satisfaction of some and disappointment to others the refresh-

ments were served to the satisfaction of all.

Mrs. Kimmitt has taught school in several of the surrounding districts and at Travers during their residence here, and at the picnic there was plenty of evidence that she had been appreciated by pupils and parents as well.

Mrs. Margaret Kimmitt, their daughter has taught school at Yetwood for three successive years and was asked by the board to take the school for the fourth term, but she is taking a school near their new home. The family will be missed at Travers and surrounding district.

Light For Plant Growth

Various Languages Respond Differently To Time Of Exposure

It did not require any "Blue paper" from scientists for farmers to know that plant growth depended on daylight, but what was not known was that different species and varieties responded differently to the length of time they are exposed to light. It is only in recent investigations that scientists have recognized this fact, which is of particular importance to those who are growing flowers and vegetables under glass.

According to J. H. Hooper, of the Dominion laboratory of Plant pathology at Saskatoon, B.C., plants that bloom naturally in the long day period, will come more rapidly into flower (under glass) by increasing the length of day by artificial illumination. On the other hand, plants that naturally bloom during that period of the year when days are short, may often be induced to bloom under glass if the length of day is artificially shortened by shading.

Apparently the plants respond to what they recognize as their natural conditions, as did the hens which went to roost when the sun was in eclipse last summer.

In addition to those plants which are affected by long or short day periods, there is a third group, which reacts little or not at all to either the sun shines much or less.

Another effect of artificial light in the greenhouse is to check certain greibous diseases, such as mildew and leaf mould, which otherwise are apt to develop during dull days. Also the artificial light on dull days tends to harden the tissues and develop the root system of the plants.

Technical agriculturists are taking advantage of electrical lighting and shading to synchronize the maturing time of varieties they wish to cross. For instance it might be difficult to cross certain late varieties of peas if it were not possible to advance or retard the bloom by this artificial means. In all plant breeding and disease work, artificial lighting has been of the greatest practical importance, cutting down the length of experiments by years.

To get their reaction to more or less light, dozens of varieties of plants have been tested out together with its cost per kilowatt hour at the Saskatoon experimental station. The maturing period has been speeded up as much as ninety days and in some cases retarded by the extra light.

As there are many acres of plants under glass in Canada today, the result of this investigation is of much importance to the growers, as well as to the scientists who are developing new species, or studying diseases.

Steady natural light has long been considered essential for growing grain. Now according to tests that have been made by the National Research Council, artificial lighting units have been found to be as good as daylight, and more uniform, for even at the best daylight changes from hour to hour.

Electricity has extended the hours which humans work and it may be that some humans would work more effectively if the hours of daylight, natural and artificial, were restricted as has been found to be the case with plants.

Eligible To Compete In Broncho Contest

Nine Canadian Champions May Ride At Chicago Rodeo

Nine Canadian champions, broncho riders have been certified as eligible to compete in the broncho riding contests at the World's Fair Rodeo at Soldier Field, Chicago, which opens September 10, it has been announced. Three other Canadian cowboys are included in the list of alternates.

Canadian cowboys eligible to compete in the order of their standings are: Bronco riding, Pete Knight, Crossfield; Harry Knight, Calgary; Canada Kid (Lee Ferrie), Calgary; Herman Linder, Cardston; bareback bronco riding contest, Smokey Snider, Kimberly, B.C.; Huppie Long, Rattleford; G. McIntosh, High River; Herman Linder, Cardston, Sask.; Canada Kid, Calgary. Included in the list of alternates are Sykes Robertson, High River, in the bronco riding contest, and Frank Sharp, High River, and Pete Forrester, Calgary, in the bareback bronco riding contest.

ENGLAND DEVELOPS NEW TRANSPORT PLANE

Our picture shows a new transport plane which has been built for the British Air Ministry, undergoing trial flights at Mouchell Aerodrom, Norwich. This giant machine has been designed to carry 1,000 pounds of mail for at least 1,000 miles, and has a cruising speed of more than 150 miles per hour. Its top speed is more than 200 miles an hour.

Mystery Man Of Europe

Even Nationality Of Munitions King Not Clear

Sir Basil Zaharoff is called the mystery man of Europe because little is known of his origin. Even his nationality is not clear. But it is known that he is one of the largest owners of munitions stock in the world. His life is nearing its end and it is said he has given away millions for charity, seeking to make amends for the men who have been killed in the wars he has encouraged and the men and women who have committed suicide after losing everything they owned in the big casino at Monte Carlo, owned by him.

He took to the munitions business early in life and history shows him to have been peddling arms to Japan before 1904. A sale of \$25,000,000 to Spain put him on his feet. Then he gained control of Vickers; he bought armaments plants in almost every large country in the world, including Canada; he was part owner of the famous German Krupp. He took over the sale of Maxims' machine guns, and while Maxim sold them to the United States, Zaharoff sold them to Spain during the Spanish-American war.

Before 1914 his plants were manufacturing war implements as quickly as they could be made. To every country he sold. Then came the great war, the crowning achievement of his life. Millions upon millions of dollars poured into his coffers. To one country he sold his guns; to the other he loaned money—all for the purpose of killing. He apparently added with the allies, became a bosom friend of Lloyd George and was knighted by the King. After the war business in armaments slumped. But Sir Basil had other irons in the fire. He bought Monte Carlo and made it pay huge dividends in the form of profits from the land where oil could be obtained. He threatened the supremacy of Rockefeller and the Standard Oil Company of the United States and of Sir Henry Detering the oil king of Europe; he became a second J. P. Morgan. Today he sits in his magnificent Chateau de Balaucourt, half blind, bent and gaunt, haggard and worn, but his keen brain still functions with all the precision of youth. He has given away millions upon millions of francs to charity and other organizations. It is said that he is determined to make amends for all those who have succumbed in his gambling rooms at Monte Carlo.

Efforts To Save Drowned

Artificial Respiration Should Be Continued Four Hours Or Longer

The Toronto Mail and Empire says: We pointed out recently the necessity of continuing, until rigor mortis or stiffening of the body, efforts to resuscitate persons who apparently are drowned. The advice is emphasized by the Metropolitan Life Insurance Company in an advertisement which appears in Collier's Magazine.

Continue artificial respiration for four hours or longer, if necessary. When changing operators, do so without losing count. Not infrequently the patient, after temporary recovery, stops breathing. Resume artificial respiration at once. Thousands upon thousands of lives have therapeutically been matched from death by this method of life saving. As a world-famous physiologist puts it, "Often, in drowning, electric or gas cases, the vital machine merely needs to be started again. It is like cranking an automobile when the engine has stalled and the self-starter is out of order."

Unusual Out Exhibit

Competitor At World Grain Show Is Scottish Woman

Out farmers of Canada are challenged by a woman farmer from Scotland. One of the entries in the competitive classes at the World Grain Exhibition in Regina is Mrs. Magie Ritchie of High Pine, Maybole, Ayrshire.

She has entered a sample in the out section from a farm which has been in her family for over 60 years. Mrs. Ritchie occupies a 220-acre farm close to the birthplace of Robert Burns, the poet, special attention being paid to oat production.

In 1931 Mrs. Ritchie won the gold medal for grain at the national stock and grain show at Edinburgh.

Estimating His Salary

A well-known attorney was always lecturing his office boy, whether he needed it or not. One day he chanced to hear the following conversation between the boy and the one employed next door:

"How much does your chief pay you?" asked the latter.

"I get \$1,500 a year. Five dollars a week in cash and the rest in legal advice."

Transits through the Panama Canal are increasing.

Definition: A speedbribe is one who uses an adjective in a telegram.

Girls Sailed As Apprentices

Two Make Trip On Windjammer Round Cape Horn

Two 17-year-old girls have captured the imagination of every sailor as well as every seaman in Falmouth. They sailed as apprentices in the barque "Parma," which has just won the Australian grain race for big windjammers for the second year in succession, with a magnificent passage of 83 days.

The girls are Marina, daughter of Captain de Cloux, skipper of the "Parma," and her friend, Sonja Lind, daughter of a retired Norwegian sea captain. They have eaten salt horse and shark steak; they have been aloft with the masthead of every sailer as the skipper was driving his ship round Cape Horn; and they have answered the call for all hands on deck when the ship was plunging at 13 and 14 knots through the southern Atlantic.

Co-operative societies are being encouraged by the government of Spain.

Nearly 200,000 London school children are given five miles every day.

Altering War Memorial

Position Of Gun Limber Made Some Changes Necessary

Canada's national war memorial is being altered in accordance with suggestions of the Prime Minister. It is learned. The memorial stood in Hyde Park, London, England, for about a year, but has now gone back to the March Brothers' studio for changing. When completed the memorial will be brought to Canada, although a site has yet to be definitely selected.

Instructions issued by Prime Minister for the alterations to be made to Canada's national war memorial were made at the request of the officials of the Department of Public Works and were designed to eliminate a curious anomaly that had developed in the construction of the memorial. The general theme of the sculptured group is the passage of uniformed figures through an arch. In the rear, and just entering the arch, is a gun limber. However, as the memorial had developed, it was noted the limber was so placed that it would have been utterly impossible for it to pass through the arch.

This defect is being remedied by the simple process of enlarging the arch. To do so, and maintain the uniformity and harmony of the group, three more figures are being inserted.

Heat For Tuberculosis

Doctor Tells Of Patients Improved By Its Use

Posibility of the treatment of tuberculosis by use of hot baths and high frequency waves was presented before the American Sanatorium Association when Dr. E. S. Mariette of Minneapolis, member of the committee on treatment, described experiments he had conducted in the field.

A majority of a number of patients who had had the hot bath or high frequency treatments over a brief period had shown marked improvement, according to Dr. Mariette. Of seven who had taken hot baths over a month, six had shown X-ray improvements, in some cases marked, and of three who had been given high frequency treatments two had shown improvement. All of the patients had been in sanatoria for years without showing any improvement whatever.

London's bill for police protection last year totalled over \$45,000,000.

Norway's foreign-trade balance is showing a favorable trend.

Parts Of Steamer Salvaged

Dredge Brings Up Bits Of "Independence" Wrecked In 1853

Hull of the "Independence," first of the U.S. Navy Lake Superior frigates, was encountered by the Duluth Shipwreck Dredge Company, operating on the United States side of the Wisconsin, where the ship sank.

The "Independence" was wrecked November 22, 1853, when her boiler blew up and four men were killed. Weeks ago bits of oak planking, copper plates, pipe fittings, and hand wrought iron rings were salvaged. It was the first salvage operations on the historic steamer since divers brought up material for world-fair exhibits in 1892.

The "Independence" was built at Chicago and brought to Michigan Soo in the fall of 1845.

Touring World On Bicycle

Retired Liverpool Policeman Has Already Visited 28 Countries

With his entire belongings strapped to the handlebar of his cycle, an ex-policeman, aged 65, rode up to Liverpool and embarked on a five-month world tour.

He was John R. W. Crawford, of the Lancashire and he was in Halifax on the Furness Withy line "Newfoundland."

Since he retired from police service in 1915, Mr. Crawford has been cycling his hobby, and has visited 28 countries on cycle tours, covering 150,000 miles.

He will spend three months in doing the 3,000 miles across Canada, and will then go on to Japan to continue his world cycle tour.

Archaeologists have unearthed a kitchen sink said to be 5,700 years old.

An Interesting Race

Old Barges On Thames Take Part In Contest For Championship

The art of growing old gracefully and of showing a bustling world that the claims of sport are not the monopoly of youth was demonstrated at Hope Point to the Mouse Lightship and back to Gravesend, a distance of almost 60 miles. Most of these representatives of an industry whose genealogy goes back to the 14th century, are in the prime of large life, which records show, in one case at least, is 130 years.

Of those who earn their living on the river, the bargemen are remarkable for the small number of casualties they suffer compared with the great risks they run. Whether they are groping their way among the miscellaneous craft in the pool or tackling to go back to the 14th century, the masters appear to have nerves of steel to overcome the hazards they take.

Instructions issued by the Prom's Hallett for the alterations to be made to Canada's national war memorial were made at the request of the officials of the Department of Public Works and were designed to eliminate a curious anomaly that had developed in the construction of the memorial. The general theme of the sculptured group is the passage of uniformed figures through an arch. In the rear, and just entering the arch, is a gun limber. However, as the memorial had developed, it was noted the limber was so placed that it would have been utterly impossible for it to pass through the arch.

This defect is being remedied by the simple process of enlarging the arch. To do so, and maintain the uniformity and harmony of the group, three more figures are being inserted.

Simplified English

Ordinary Conversation Can Be Carried On With 800 Words

Foreigners state that they find learning the English language very difficult. Possibly that is not because of the number of words, which are in English, when compared with the new Oxford dictionary is said to contain over half a million, but the variations in spelling and pronunciation pose problems for the foreigner. Words ending in "ough" can be pronounced in various ways, "c" and "ch" may be hard or soft, and plurals are tricky things. As a Frenchman is said: "If the plural of mouse is mice, why isn't the plural of house mice?" We give it up.

An Englishman, C. K. Ogden, of the Orthological Institute, Cambridge, has been working for ten years on the production of a simplified English language. He calls it "Basic English," and it consists of only 850 words. He can put them all on one sheet of paper, and he claims that ordinary conversation can be carried on by these words.

His 850 words include 600 names of persons, one hundred and fifty words of verbs, and the rest are adjectives, prepositions, conjunctions, and so on. Eighty-two words cover all the prepositions, pronouns, conjunctions, and adverbs. There are only 18 verbs which Ogden calls "operators."

The whole of the grammar could be summarized on a postcard as follows:

1—Plurals in "s."

2—Derivations in "er," "ing," and "ed" from 300 nouns.

Adverbs in "ly" from the adjectives.

4—Derivations with "more" and "most."

5—Conjugations by inversion or "do."

6—Conjugations of pronouns and the 18 verb forms. Measurements, numerals, currency, calendar, and international terms are used in the list.

It is claimed for basic English that the normal intelligent foreigner between 16 and 21 can master it in 30 days. For the English-speaking person, who has to learn to eliminate and add new words, the time is slightly longer.

Of course, this does not allow for the needs of the grandiose speaker, the magniloquent orator, but for the ordinary man-in-the-street. As a matter of fact a large percentage of people do not use more than a great number of words or a great many terms. Even well educated people seldom go beyond 5,000. If the most erudite of speakers were to write every word he knows his list would not extend beyond 10,000.

It would be a good thing if education limited our knowledge of the language to 5,000 words. Then, perhaps, some of our Parliamentary and platform windjammers would not take such a long time to say what's on their minds.—St. Thomas Times-Journal.

New Method Is Effective

Scientists Explain Why Certain Nerve Will Sterilize Milk

If you hear an ear-splitting shriek as you are passing a dairy in a few months' time, don't rush to the rescue or send for the police. It is quite true that murder will be taking place, but the victims will not be men or women—only microbes. The shriek is not given out by them. It is, so to speak, put into them, and it does more than annoy them; it blows them to bits.

Many ways of sterilizing milk have been invented, but the "shriek" method is the most effective.

But why should a noise kill microbes? Put a hand just between a friend's shoulder blades when he is talking and you will find that you can feel his ribs vibrating strongly. Those vibrations come from the sound waves made by his vocal chords. All sounds are caused by vibrations, and the vibrations, the higher the note.

It occurred to a scientist that if microbes could be made to vibrate so fast, quickly they would be destroyed.

He started experiments and soon found that his idea was correct. All that remained was to discover the note which produced the most effective vibrations. He then tried applying the shrieker to milk that was full of microbes. So successful was the experiment that milk can be completely sterilized by letting it blow over the metal tube that is producing the shriek.—The Times.

The French mine-laying submarine "Diamant" was launched recently at Moulins.

One may have good manners but not carry them about with him.

A secret is either too good to keep or not worth keeping.

FANCIFUL FABLES

Says Capitalist Nations Should Pool All Scientific Knowledge To Meet Soviet Trade Challenge

Warning that capitalist nations must pool all scientific knowledge and trade secrets to meet the challenge of Soviet Russia's industrial system and end unemployment was voiced before the American Association for the Advancement of Science.

Only by this means could the nations that now are in the lead industrially maintain this lead, said Dr. A. P. M. Fleming, engineer of the Metropolitan-Vickers Electrical Company of England, one of the 30 foreign scientists invited to speak before the summer meeting of the association.

"This is in the U.S.S.R.," he said, "a larger body of organized research workers under unified control than exists in any other individual country in the world. The Soviet government looks to science to play a most important part in its industrial and economic activities."

"Whether the Soviet plan succeeds or fails, already enough has been accomplished to show the possibilities of this combined scientific effort. In partial success may have been reaching effects on the rest of the industrial world."

This situation is developing at a time when there is little industrial co-operation between the other countries and there is no doubt that this challenge of a communist to a competitive plan justifies a careful consideration of the advantages of further co-operation especially in the matter of pooling of scientific resources and experience.

"With the lead that the foreign manufacturing countries jointly possess and with the full use of the scientific resources, it should be possible to meet the challenge successfully."

Navigates Her Own Craft

Twenty-year-old Nova Scotia Girl Has Master's Papers

Nova Scotia has almost as many sea captains as Kentucky has colts, with the difference that the Nova Scotia sailors have a better right to their titles because of experience, ability and valor. But one captain among them stands unique—because she is a woman.

Captain Mildred I. Wambold, 21-year-old native of Lunenburg is probably the only female in Nova Scotia who not only owns, but holds master's papers and actually navigates her vessel. And the craft is no toy yacht. It is the 422 gross ton schooner E. P. Theriault.

"Why, I don't think I could live if I had to stay ashore," the pretty young sailor declares.

Born of a long line of sea-faring forefathers, she boasts that she hasn't been six months ashore in the past nine years. Bred to the sea, she made many trips with her foster-father, Angus Publicover, Staten Island, N.Y., formerly of Lunenburg, and she made a special study of navigation.

Now her schooner is registered in her name. As master, she signs the clearance papers, transacts all the business of the craft, and rules with a firm hand her crew of one Nova Scotian and eight natives of Barbados. Her foster-parent accompanies her on her voyages, but only as mate. She trusts the schooner to no one but herself.

Captain Mildred is no fair-weather sailor. Last February she sailed from Lunenburg with sail for New York, but when 250 miles from destination, the craft was caught in a terrific gale. The vessel was forced to turn and run before the wind. Her sails were stripped from her and her gear damaged. By the time the hurricane had blown itself out, the E. P. Theriault had been blown within 150 miles of Barbados. The young captain put into the islands, and sold her cargo there.

She makes Barbados from Shelburne in 10 days, and from Bridgewater in 17 and 13 days, on different voyages. She made a trip from Bridgewater to Lunenburg in 13 days, all considered very good time.

The E. P. Theriault, built on the Fundy shore, is now registered at Bridgewater, Barbados.

Were Large Shoes

Chief attractions of the state museum in Missouri's state house at Jefferson City are a pair of shoes, size 22, once worn by Miss Ella Ewing. She was a native Missourian, who died several years ago, and was feet 4 inches tall. She was supposed to be the "largest woman in the world" during her life.

Selling More Art Treasures

East Of Egmont's Priceless Silver Plate Going Into Auction Room

More treasures of the rancher East of Egmont are to be sold at Christie's in London. The old masters and other pictures inherited by the late Earl have already been disposed of, and now the massive silver plate is coming in to the auction room.

It is only four years since Frederick Joseph Trevelyan Percival left his ranch in Alberta and went to England to settle at Avon Castle, Hingwood, Hants, as the tenth Earl of Egmont.

The silver plate now to be sold contains a good deal of 18th century silver salvers, meat dishes, and the like, several of which were especially made for the Earl.

The most important item in a rare James I. silver-gilt wine-cup, a hairloom which had been presented to Lord Arden, another branch of the family, by Princess Elizabeth, afterwards Landgravine of Hesse Homberg, for use in his chapel at York.

The Baron Arden was a Lord of the Admiralty about the end of the eighteenth century, and was M.P. successively for Lancashire, Warwick and Tynes.

A set of three George I. caskets is also a rare item bearing the name of the celebrated London silversmith, Paul Lamerie, 1725.

A German silver-gilt tankard laid in inscription by the Earl, who was presented to Lord Arden by Queen Charlotte, the consort of George III.

Dominion Offices For London Headquarters Are All Together In Heart Of City

The opening of the handsome new offices of the government of South Africa by the King was interesting another development of the bunching together of the Dominions offices in one particular part of London, England.

The South Africa building occupies one of the most commanding sites in the capital of the Empire at the corner of Trafalgar Square and the Strand, looking down Whitehall and over the street to Charing Cross. Generations of Londoners and overseas visitors have the building which stood there before—Morley's Hotel, right across from it on the opposite corner of the Square, is Canada House, the offices of the High Commissioner, between these two points and on the south side of Trafalgar Square are the offices of the Canadian Pacific and the Canadian National Railways. A few yards further west up another street are the offices of the British Columbia government. There is also a Canadian bank building.

Going past between the Strand are the premises of the government of Rhodesia, the offices of the province of Ontario and almost opposite the latter the Australian office.

So that the overseas visitor seeking his headquarters is right in the heart of London wherever he comes from.—St. Thomas Times-Journal.

The world's supply of copper at the 1929 rate of consumption will only last about fifty years, in the opinion of certain scientists.

By lighting and heating a beehive by electricity in Europe recently the production of honey was increased 17 pounds.

By Ruth Rogers

TAKE OFF YOUR COAT: JUST AS YOU PLEASE!

It's smart as can be either way. As everyone knows Dame Fashion is very fond of capes for spring. And here's a darling model that is very versatile. Take off the cape and you have another dress. Darn blue crinkly crepe silk carried out this fascinating model. A crepe silk print will be charming too. Style No. 712 is designed in sizes 14, 16, 18, 20 years, 36 and 38 inches bust.

Size 16 requires 4 yards 39-inch, with 3/4 yard 39-inch contrasting. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Things that help one to sweeten and light: Visit of your neighbor's hens to your garden; the hiding of your favorite tulip bed of a bone by a vagrant dog; the early rising neighbor who plays a lively tune on his lawn mower just as you are getting by to your morning's sleep.

There is more kick in anticipation than in realization.

Prince Of Wales Expresses Confidence In Canada's Ability To Emerge From Depression

Very Easy To Obtain

Non-Exportable Goods Sold Freely In England

Two drugs capable of killing a man without trace are on sale at large chemists throughout the country, says a London newspaper.

They are supplied without question to any person who demands them. One of them bears no "poison" mark on its bottle.

Neither of them can be detected after death.

Many poisonous substances are obtainable from all chemists, but these two are remarkable for the ease with which they are bought, for the impossibility of tracing them once they have been administered, and for the fact that they produce symptoms similar to those due to natural diseases.

The pathologist of a famous London hospital, questioned by a newspaper representative about one of these substances, said: "If ever I wished to commit murder, this is what I should choose."

It is a protein-like compound, in daily use for the treatment of a common disease. It is supplied as a liquid in tubes which bear no poison mark. A child can buy it anywhere.

And yet the injection of the contents of a two-shilling tube induces coma followed by death in from four to six hours.

It is impossible to analyse, and it leaves no trace in the body after death.

A newspaper representative visited a chemist's shop near Oxford Street, and for two shillings received a tube containing more than a fatal dose of the liquid.

The second deadly poison is a liquid made from the seeds of an Indian tree. The medical dose is one drop, and an overdose results in an exceedingly painful death.

Two grams are enough to produce fatal results.

It is, too, impossible to detect after death.

At the same shop, two grams of the poison were bought for 1s. 6d. For this it was necessary to sign a receipt, but no name was taken, and it was not asked to what use the drug was to be put.

Chemical Changes In Liquids

Scientists Find High Pitched Sounds Will Kill Bacteria

If the baby could cry at a higher pitch he might help make his own milk more digestible.

A study of the effect of sounds in causing chemical changes in milk was reported to the American Association for the Advancement of Science by Dr. E. W. Fendler and L. A. Chambers of the University of Pennsylvania Medical School.

Scientists have recently learned that bacteria in milk, water, fruit juices and other liquids can be killed by "super sounds" of very high pitch.

Less than one-twentieth of the people in Britain now pay income tax.

The Prince of Wales told 100 guests at a Dominion Day dinner he was confident of Canada's ability to emerge from the economic depression and proceed to a bright future.

Standing beside Prime Minister B. Bennett, the Prince Minister told an audience including representatives of every phase of empire life, the prince said, "I heartily Canada better than any other part of the empire. I am really quite ashamed to think a x years have elapsed since I have been to my ranch in Alberta; not that my residence at High River or any effort on my part could alter the price of cattle or my vegetable exchanges."

"Canada," he continued, "is suffering with the rest of the world. I am proud of my association with her, and am confident, as her citizens are confident of her recuperative powers and bright future."

The Prince dealt briefly with the struggling world economic conference and last year's Ottawa conference of which conference brought together representatives of all the empire nations.

"The hopes of the world," he said, "are fixed just now on the economic conference, but my mind naturally goes back to a year ago, the era of the Ottawa conference."

"Quite apart from the discussions and agreements then made, that gathering showed the world that here in a great national unit able by the very nature of its composition to meet in business, but without any trace of that olden to progress and that evil of present-day, individual nationalism."

"We all know," he said, "that the work of the economic conference would be beset with very great difficulties, but we must be confident for the sake of the world."

"Not the least impressive feature of the world conference," he declared, "is participation in representatives of the great nations of the British Commonwealth of nations."

Those nations of the commonwealth, he said, come with best wishes to the great task of helping put the world on the road to economic and financial recovery."

What he said was that the work of the economic conference would be beset with very great difficulties, but we must be confident for the sake of the world.

KING FESAL OF IRAK VISITS LONDON

Here we see His Majesty King George leaving Victoria Station with King Faisal of Iraq on his way to Buckingham Palace where the Arabian monarch is to stay for a few days. King Faisal is acknowledging an enthusiastic reception by the people of London.

Selling Big Japanese Coin

Largest Gold One In World Weighs Nearly Four Ounces

The Japanese Ona, the largest gold coin in the world, is to be sold at London, England.

Stamped with the seals of the government mint, the Japanese Ona is a large oval plate of gold measuring five inches across, and weighs nearly four ounces.

The coin was signed in Japanese ink by the superintendent of the mint as a guarantee of its purity. The signature was considered the most important part of the coin, and if it was rubbed off the plate ceased to be current money.

Had Long Wait

When Peggy returned from her first day at school she was asked how she enjoyed it.

"Like it all right," said Peggy. "but I didn't get any present."

"What made you think that you would get a present, dear?"

"Teacher said, 'Sit there for the present'; and I sat there all morning and never got one."

Brazil's Surplus Coffee

Brazil this year will have the biggest crop of coffee in history, millions more than the whole world uses. It looks as if that country will have to continue its borders, having already burned more than 10,000,000 bushels.

WORLD HAPPENINGS BRIEFLY TOLD

The Canada-South Africa trade agreement, negotiated during the imperial economic conference in Ottawa last summer, has become effective.

The world disarmament conference has been adjourned to Oct. 10 despite a protest by Rudolph Nading, Chancellor Hitler's representative, that the long recess amounted to a first-class funeral for disarmament.

Approximately 2,000 single unemployed men are in Vancouver receiving no assistance from either city or province because of their refusal to go to relief camps or because they left these establishments.

E. L. Bushnell, director of radio station CKNG, Toronto, has been engaged by the Canadian radio broadcasting commission to make a tour of the western provinces to organize programmes from this area.

Detention for 28 days was the sentence meted out to Canadian Harris, seamy at Windsor Castle, following a court martial. Harris was found asleep at his post while the royal family were in residence some time ago.

A plea for an even greater measure of co-operation between all nations in the fight against tuberculosis was made by Professor S. Lyle Cummins, of England, noted authority on the disease, at the annual dinner of the National Tuberculosis Association held in Toronto.

Dr. John M. Chapman, associate professor of banking at Columbia University, in an address at the round table on money, banking and financial situation, at the institute of public affairs, said that the United States "bank failure movement is not ended."

Seven speedy destroyers used by the United States coastguard for years to chase rum-runners and other smugglers operating off the Atlantic coast have been returned to the navy because the government's economy programme necessitated a reduction in expenditures.

Has His Own Method

British General Thought Eight or Nine Languages
Lieutenant-General Sir Edmund Head was exchanged what was practically a snore at the Tower of London, England, for an active part by his new appointment as Quartermaster-General of the Forces in India. As the youngest general officer in the British Army for many years—still less than fifty-four years old—he will now have opportunity to use his keenness to the full. He taught himself the eight or nine tongues he knows by a method of his own, memorizing every day a score of nouns and adjectives. Verbs come in their own good time, and if he is ever at a loss for one, he bridges the gap by an elegant gesture and carries on calmly with the nouns.

Learning To Work

Many Opportunities On Farm To Learn Use Of Hand and Hammer
During the long summer holidays boys on the farm do plenty to do learning to work, and it is very important that opportunities should be found for them. Boys need to be able to use their hands expertly as well as their minds. If not they will find the rough road and steep at the outset of life. Girls have chance to learn to work in their homes, under the direction of their mothers, the best of all teachers. Of course a boy should have some time to play, but idleness is a great stumbling block in the way of life, and is a sure road to death through work.

Selling Wheat Abroad

Almost Sixty Countries Purchased From Canada Last Year
Canadian wheat last year was sold to almost 60 countries, made up of 20 within the empire and the balance beyond empire boundaries. Of the total of 140,000,000 bushels to empire ports no less than 135,000,000 bushels went to the United Kingdom.

France and Belgium purchased each about 14,000,000 bushels, Italy and the Netherlands together accounted for 11,000,000 bushels; China and Japan, 12,500,000 bushels; Germany, 6,000,000 bushels; and Greece, 5,000,000; Norway, Sweden and Peru purchased about 1,000,000 bushels each.

Industrial activities in Sao Paulo, Brazil, are increasing.

More than 1,500,000 radio sets were sold in England last year.

W. N. U. 2002

Canadian Authors Tour Britain

Party of Fifty Will Visit Literary Centres Of The British Isles

Following the annual convention of the Canadian Authors' Association which this year was held in Quebec City, a party of about 50 Canadian authors and their friends sailed (July 1st) on the "Empress of Britain" for a tour of the literary centres in the British Isles. They will be met by some of the most distinguished authors of Great Britain and will experience the advantages of personal contact with the scenes depicted in English literature including the country of Hardy's "Tess" the spot where Keats wrote "Ode to the Nightingale," Westminster Abbey, Dr. Johnson's house, the inn made famous by Eliza Follen, Stratford-on-Avon, Kenilworth Castle, Wordsworth's home, the Robert Burns country, and other centres of literary interest.

Among those who it is expected, will extend courtesies and greetings to the visiting Canadians will be Sir James Barrie, Rudyard Kipling, John Buchan, John Galsworthy, Henry Newbolt, J. B. Priestley, John Drinkwater, and George Bernard Shaw. There will also be recognition by leading public bodies and parliamentary.

The Canadian Authors' Association was organized in 1907 with a view to promoting the interests and craftsmanship of Canadian authors. It has branches from coast to coast and a membership of about 900. The association has helped to disclose the very substantial contribution which Canadian writers are making to current literature—a contribution which had to some extent escaped observation due to the fact that a large part of Canada's literary production finds its way to the public through the channels afforded by publishing houses in the British Isles and the United States, with the result that numbers of well-known Canadian writers were commonly regarded as being Englishmen or Americans. During the 12 years since the association was organized great advances have been made in the Canadian publishing industry, particularly in the field of magazines and literary periodicals.

YOUR NEW BLOUSE WITH THOSE SMART FUL SLEEVES AND BECOMING TAILORED

Here's a charming new model which has lots of good style about it. Yet as you can see, it is exceedingly simple to fashion, yet very detail conforms to the dictates of the mode. White crinkly crepe silk made the original.

It is also lovely in grey, maize, light blue or eggshell.
Style No. 701 is designed in sizes 14, 16, 18, 20, 22, 24, 26, 28 and 30 inches bust.
Size 16 requires 2½ yards of 39-inch material.
Price—ready made 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

CHINESE GENERAL AIDS POLTRY IMPROVEMENT

General H. H. Den, commander of the 28th Chinese Army who has given his cheque (shown above) for \$500 to construct a modern poultry barn for Canadian breeding stock recently donated to missionaries in his district by Vancouver men and the University of British Columbia. Rev. Frank Dickson, M.Sc., late of Yarmouth, N.S., is in charge of agricultural projects, including the improved poultry barn.

Great Masonic Gathering

Duke Of Connaught Opens New Headquarters In London

At one of the greatest Masonic gatherings which has been held in London, England, for many years, the Duke of Connaught, Grand Master, opened the new Masonic headquarters adjoining the old headquarters in Great Queen Street. The lofty tower of the new building rises above the neighbouring buildings in the neighborhood of Kingway. There is a great inner temple surrounded by 15 lodge rooms, a large museum and library and extensive administrative offices. The coat which runs to well over £1,000,000, was raised on the suggestion of the Duke of Connaught just after the close of the war. The building will be a memorial both to the close of the war and to many Freemasons who fell in action.

Only One Reigning Queen

Wilhelmina Of Holland Has Celebrated 40th Birthday

Wilhelmina of Holland has the distinction of being the only reigning woman monarch in the world today. Her Majesty, who is 52 years of age, has already celebrated her silver jubilee, being crowned when 18 years old. She spends most of her time at her country palace near Apeldoorn, where she paints water colors and goes long rides daily. Her court is very simple. Wilhelmina speaks several languages and is also a bridge and golf enthusiast. Visiting statesmen present at the openings of her palaces all remark on the clarity of her enunciation.

Something Worth While

Investment In Youth Is Most Exciting Speculation Known

In times like these invest in boys and girls. Men talk about buying stock at the bottom. When you invest in a boy or girl you are always buying at the bottom. You are sure that the youngster is going up, and there is no telling how far. I invite every man and woman in America to take a flyer in Childhood Preferred. I predict a great future for this security. It has investment merit combined with the most exciting speculative possibilities. You are sure to get a man or a woman; you may get a great man or a great woman.

CYCLIST: "I don't care who you are, I'm going to speak my mind." LADY DRIVER: "Please don't. I'm sure you haven't a nice one."

The Humourist, London.

SUNDAY SCHOOL LESSON

JULY 16

DEBORAH

Golden Text: "God is our refuge and strength. A very present help in trouble."—Psalm 46:1.
Lesson: Judges, Chapters 4 & 5.
Devotional Reading: Psalm 46:1-3, 8-11.

Devotional Reading: Psalm 46:1-3, 8-11.
Explanations and Comments
Israel Oppressed By Sisera, Captain Of Jabin, King Of Canaan, Chap. 4:1-3.—"It is easy to find a refuge in trouble."—Psalm 46:1.
Lesson: Judges, Chapters 4 & 5.
Devotional Reading: Psalm 46:1-3, 8-11.

"Something very much like that happened in France five hundred years ago. A great English lord held the holly of his hand; the spirit of increased rage in the case of Sisera, was divided; the wing was a poor weakling with no thought but to kill the more fiercely. And then, when the men were of no use at all, the spirit of his race with his own kindling fire, he saw her King of Israel in grey old hair, and he declared what was the judgment of God in national affairs, and she also settled the oppressors, for their territory bordered the Plain of Esdraelon. It is in the contrast of that figure which will best place before us the nature of the woman of the story. Dean Stanley writes: 'It is the same Jewish palm under whose shadow she sits, but not with downward eyes and folded hands and extinguished hopes, but with the fire of faith and energy, eager for the battle, confident of the victory.'"

With faith in God's directing hand, such as empowered Joan of Arc to defeat the oppressors, for their territory bordered the Plain of Esdraelon. It is in the contrast of that figure which will best place before us the nature of the woman of the story. Dean Stanley writes: 'It is the same Jewish palm under whose shadow she sits, but not with downward eyes and folded hands and extinguished hopes, but with the fire of faith and energy, eager for the battle, confident of the victory.'"

Fruit Popular In Canada

Consumption Of Apples, Oranges and Bananas Is Heavy

Notwithstanding the fact that the people of Canada eat more eggs and butter than the people of any other country and register high as meat eaters, they also enjoy fruit. The statisticians of the Canadian government have released the following figures on fruit consumption in Canada for the fiscal year ended March 31, 1933, which show that the domestic consumption of apples was 2,272,100 barrels, of oranges 2,683,471 boxes, and 3,325,900 stems of bananas. On the basis of the population of 10,506,000 the average per capita consumption was about one-fifth of a barrel of apples, more than one-quarter of a box of oranges, and less than one-third of a stem of bananas.

The total domestic consumption of the commercial apple crop grown in Canada has been fairly consistent during the past ten years, varying in somewhat the same manner as commercial production, whereas imports show a gradual decrease which has been more rapid during the last two years. Bananas show a steady increase in imports, but with a drop during the 1932-33 season to about the 1927-28 level, although the population has increased at a greater rate and during the last three years consumption per capita has declined. Imports of oranges vary from year to year and show no decided trend to decrease or increase, which trend is also lacking in the consumption per capita.

U.S. Population Increase

The population of the United States has increased 2,917,954 since April 1, 1930, to a new high of 123,693,000. So declared the census bureau in presenting some complicated additions, subtractions and divisions arrived at by estimating the increase since the last census on the basis of the considerable data regarding births, deaths, immigration and emigration.

To Measure Wind Resistance

Seven Hundred Miles-An-Hour Tunnel Built At English Laboratory

Important improvements in the range and accuracy of shell and rifle fire will result, it is hoped, from a new 700 miles-an-hour wind tunnel, which is now being constructed at the National Physical Laboratory, Teddington, England.

The tunnel will provide the fastest stream of air which has yet been produced—with a velocity nearly equal to that at which sound travels through air. This will render it possible for the first time for wind resistances to be measured at speeds close to the highest velocities obtainable.

As a result research workers will be able to obtain exact data on the relative merits of projectiles constructed with various modifications to existing standard shapes. Instead of elaborate and costly gun trials with projectiles the whole work will be performed in the laboratory. The shell will run in the case of shells, and greater resistance to "drift" due to a sideways wind, in the case of rifle-fire. In the latter case it will be possible to reproduce the full effect of lateral wind of any desired strength by placing the bullet to be tested at an angle to the 700-miles-an-hour gale.

The importance of such practical tests lies in the fact that hitherto it has proved impossible to make precise calculations of air resistance based on theory alone. With both shells and aircraft it has been found that important improvements can be obtained by apparently insignificant changes in design.

In the method which will be adopted, the projectile to be tested will be wind-tunnel by an apparatus which will automatically record the various forces exerted on the projectile. This record can be transmitted by electrical means to an observer outside, who has as full a knowledge of everything that is happening to the projectile as if he were in the tunnel.

The new tunnel is to be constructed, in order to make use of the enormous pressure developed in the laboratory's compressed air tunnel for aircraft testing, which is ready to be put into use.

When testing in this tunnel is completed, the air it contains, which exerts a pressure of 5,000 tons on the giant castings at either end, will be released through the new projectile tunnel. It is estimated that the blast of air will last for about twenty minutes at the full speed. In addition to projectile tests the tunnel will be used to measure the forces on the tops of aeroplane propellers, from which other improvements are expected.

The creation of the compressed air tunnel, which alone makes the projectile tunnel a possibility, is a minor triumph for the British steel industry. Its components are so large that it was necessary to build the containing building round it. The whole has been built on the site of the old gunpowder magazine, which was 550 pounds a square inch—more than forty-five times the normal pressure of the atmosphere.

Taking Wonderful Trip

Party Of Ten Hawaiian Boys On Way To Yukon

When R.H. Monowal ended in Vancouver, it was just the end of another journey for most of the passengers, but for 10 boys from Hawaiian Islands, it was arrival at the stepping-off place for magnificent adventure.

They are members of a party from Bushnash school, under direction of Mr. Hayne Beauchamp, and their destination is Yukon and Alaska, where they will do nothing at all except travel 1,600 miles to the Yukon River in small boats; prospect for gold; bottle; take samples of plankton (minute sea food); take moving pictures. They have arranged for some boats at Whitehorse, and will build others.

The boys, ranging in age from 14 to 17, were picked for their physical and mental ability. They will visit Dawson, Fort Yukon and Tanana on their trip down the Yukon.

Trilled Their Chief

In the first use of the new radio equipment for policemen, the chief constable of Nottingham, England, broadcast the description of a man wanted, the cruiser came jumped on the trail and when they stopped the "fugitive" driver they found he was the chief constable himself.

You need to be broad-minded to live in a narrow-minded community.

WORLD PARLEY IS SAVED FROM UTTER COLLAPSE

London, Eng.—The world economic conference, on the verge of collapse, was saved from complete disintegration by the action of Prime Minister R. B. Bennett of Canada and President Franklin Roosevelt of the United States.

Decision of the conference steering committee will permit the meeting to continue on a restricted agenda, from which all monetary and tariff questions were removed at insistence of France and the European gold-bloc.

A sudden switch in the American attitude, detected in a telephone conversation between the president and Secretary of State Cordell Hull, placed the United States firmly behind continuation and received immediate, vigorous support from R. B. Bennett.

The energy of Mr. Bennett's appeal at the turn over Neville Chamberlain, Britain's Chancellor of the Exchequer, who had been only lukewarm toward the idea of continuing under adverse circumstances. When the vote was taken France alone of the 12 nations represented on the steering committee held out for the question.

The gold group had regarded Mr. Chamberlain as leaning to their view, but the force of Mr. Bennett's argument, expressed in his did the wishes of all the British dominions, swung him quickly to their side.

France and Georges Bonnet, French Finance Minister and leader of the gold-bloc, was weakened in the final stages of debate by realization of the danger of isolation. He did the wishes of all the British dominions, swung him quickly to their side.

Future outlook of the conference however, was limited by French and gold-bloc insistence they will not participate in any discussion of monetary questions.

The steering committee recessed at lunch, after three and a half hours of heated discussion without reaching any definite point of agreement. Reassembling after lunch, the delegates decided to continue.

Leaving the meeting, Prime Minister R. B. Bennett of Canada, said of himself as "pleased with the proceedings of the bureau up to this point."

It was well known Mr. Bennett was leading delegates of all the Dominions in a strenuous fight to save the conference from dissolution.

He was understood to have strongly stressed during the morning session that a recess of the conference at this time would be a step in the wrong direction.

Prime Minister Bennett is the only delegate from the Dominions who is a member of the conference's steering committee, limited to 12 of the nations. But in opposition to the action of the conference he was presenting a view in which they all concur.

When the steering committee dissolved the point at issue was the program of conference work submitted by Cordell Hull of the American delegation. The French were opposing the American program. They are willing to leave the conference in being only for discussion on marketing and production of commodities.

Goodwill Air Tour

Twenty-Five Planes From Winnipeg To Tour Western Provinces

Winnipeg, Man.—Under the leadership of T. M. "Pat" Reid, well-known war-time aviator, the third annual Manitoba goodwill air tour will cover the three prairie provinces this year. It was announced Thursday. Between 20 and 25 planes will sweep westward as far as Edmonton, taking off from Winnipeg Aug. 5 and returning Aug. 20. Aim of the air tour is to demonstrate speed and safety of aerial travel and progress Canada has made in aviation.

Historical Page at

Prince Albert, Sask.—Four hundred performers will take part in the historical pageant being prepared for the golden jubilee Prince Albert annual exhibition July 21. August 1. Exclusive One hundred and eight small girls, 64 young men and 212 young women will be required for the production, being prepared for presentation before the grand stand.

Plan New Processing Tax

U.S. Fugate Officials Expect Large Returns From Levy On Hogs

Washington.—United States farm administrators have drafted tentative plans calling for a processing tax on hogs by Oct. 1 to provide up to \$150,000,000 to finance application of the Farm Act to corn and swine. The plans will not take final form until after a meeting of corn and hog producers and their representatives which secretary of agriculture Henry Wallace has suggested be called in mid-July to obtain a cross-section of sentiment regarding the relation of the act to the two related products of the corn belt that have suffered from low prices in recent years.

If the levy is approved in connection with a corn-hog program to be worked out by August 1, it would be the fourth processing tax to go into effect before winter sets in. The 3-cent a bushel wheat tax became effective at midnight July 26. A similar processing tax on cotton, probably four cents a bushel, became effective on August 1 if the acreage reduction campaign now being urged before winter sets in. A new, and a processing tax of about six cents a pound is to be levied on cigar leaf tobacco by October 1.

Death Toll Was Heavy

Accidents Take 144 Lives In U.S. On Independence Day

New York.—Lives of 144 men, women and children paid for the celebration in United States on July 4, 157th anniversary of the republic. Automobile accidents accounted for 62 deaths, 46 persons drowned, six died as a result of firework, and 30 were killed from other accidental causes. Thousands of other celebrants suffered injuries, many of them critically hurt and property damage was heavy. Shootings, fights and aeroplane accidents contributed to the death toll.

In Chicago a parachute jumper fell to his death before 100,000 horrified spectators at the world's fair.

Peculiarly, Chicago, the play centre of the nation as the result of the Century of Progress, escaped with but three automobile fatalities despite traffic-clogged streets that poured massive crowds into the world's fair ground.

Electrify Grain Elevators

Big Program Of Work Is Started In Alberta

Calgary, Alberta.—An electrification program for 175 Alberta grain elevators, to cost \$125,000, has been started, according to the Calgary Albertan. All switching and control equipment will be manufactured in Canada. Eastern manufacturers will turn out about 400 electrical elevators, the paper adds. The co-operation of elevator companies, equipment manufacturers, contractors and officials of the Calgary Power Commission, supply sources, making the program possible. The work will bring jobs to men at present unemployed, the paper concludes.

Demand For Canadian Wheat

World Grain Show Delegate Sees Good Market In Britain

Winnipeg, Man.—"I look for a much broader demand for Canadian wheat in the United Kingdom market in the near future," said William Smith, Edinburgh, Scotland, manager of the Scottish Co-Operative Wholesale Society, who arrived in Winnipeg. Accompanied by Neil Beaton, newly elected president of the society, Mr. Smith is en route to the World Grain Show at Regina this month.

To Repair Vessels

Kington, Ont.—One hundred men will be employed for the next three weeks or a month repairing the Canada Steamship Lines grain carrier "Brentwood" at Kington. Tuesday morning the ship started work on the vessel, damaged when it ran aground a few weeks ago en route here with a cargo of grain. It was announced the job would cost between \$70,000 and \$80,000, the highest repair job in the district for some years.

Chinese Feel Insulted

Chicago.—The Chinese Consolidated Benevolent Association protested to the Century of Progress Exposition officials against the inclusion of the southern Manchukuo exhibit in the Japanese concession at the exposition. A letter signed by Chew Low, president of the association, called the exhibit "a direct insult" by the Japanese.

Would Become Citizen

Vergin To Apply For Naturalization Papers

Kamauak, Sask.—Making his first appearance in public since he was released by order of Mr. Justice R. A. Robson at Winnipeg from custody of immigration officials who had twice attempted to deport him as an alien, Peter Vergin, Donkhorst leader, told 2,000 of his followers from all parts of Saskatchewan and Manitoba, he had completed his five years' residence in Canada and he intends to apply for naturalization papers.

In the course of an address which dealt largely with religious matters, the spiritual as well as temporal head of the Christian Community of Universal Brotherhood, appealed to his audience to donate money to help suffering members of the community in Russia.

Independent Donkhorsts at the meeting expressed the opinion the first duty of the community lay towards those of Canada's 16,000 Donkhorsts who are suffering.

To Brave Niagara

Plans To Go Over the Falls In A Barrel

Niagara Falls, Ont.—Planning to venture over the terrifying cataracts of Niagara Falls, Alfred Huxton, of this city, is scheduled this month to make the daring plunge, encased in an iron casket designed for the purpose.

The barrel Huxton intends to use, is of steel construction with a port-hole looking from the inside. A Russian surgeon is sitting on the horsehair falls and through the lower rapids to Queenston.

Case Is Completed

Ottawa, Ont.—Hon. Lyman P. Duff, chief justice of Canada, and Justice Willis Van Deventer of the United States supreme court, sitting as special commissioners, have completed their investigation into the "I'm Alone" sinking, and will render their report to the governments of the United States and Canada.

GRAIN TRADERS PONDER FUTURE MARKET TREND

Winnipeg, Man.—In the face of dwindling export business, Canadian wheat and the largest surplus Canada has ever had at this time of year, recent spectacular rises in wheat prices here have caused more conservative traders to pause and consider the picture the grain market is likely to present in the near future.

United Kingdom importers showed less and less disposition to increase their stocks of wheat by buying Canadian grain. Traders are inclined to look to the importer for the key to what levels wheat prices will ultimately reach and hold.

Statistics on export trade would indicate the buyer in Europe has followed a hand-to-mouth policy for some time. Wheat stocks in the United Kingdom, ports which exceeded 30,000,000 bushels in November, 1931, stand today at slightly more than 12,000,000 bushels, while mill stocks are also reported extremely low.

RUSSIAN DELEGATE AND HIS ENGLISH WIFE

Here we see V. Litvinoff, leader of the Soviet Union delegation to the World Economic Conference, leaving the Geological Museum, where the conference is in session, with his wife, who is an Englishwoman.

HEADS ROTARY

John Nelson, native of Paisley, Ontario, and at one time editor of publisher of several leading Canadian newspapers, who was unanimously elected president of Rotary International at the meeting in Boston.

Whales From Churchill

To Be Placed On Exhibition At Chicago Fair

Saskatoon, Sask.—Saskatoon imported its first fish from Churchill—13 Arctic halibut, berring for local dinner tables. And the berring will be supplied by three white whales, destined not for dinner tables but the world's fair in Chicago.

Procured for the Chicago show the whales were caught off Churchill on June 29 and it is expected that they will reach the public appearance here during the next few days. S. H. Stebbings, Saskatoon, is endeavoring to make arrangements for showing them in a local cold storage plant.

The snowy whales are in ice for the train journey south.

Mr. Stebbings also expects to complete arrangements for a showing this summer on the class "A" western fairs circuit.

May Take Vacation

Health Of Sir John Simon Is Causing Anxiety

London, Eng.—The health of Sir John Simon, British Secretary for Foreign Affairs, is causing increasing anxiety to his friends and it is understood he may take a long vacation, probably at sea.

A peerage for him has been mentioned if the low blood pressure, from which he is suffering, makes his continuation in office inadvisable. He was reported to have sold his country estate, Fritwell Manor, in Oxford.

Princess Royal Must Rest

Only Daughter Of King George Cancels All Engagements

London, Eng.—It was announced today that the princess royal has cancelled all her engagements. "There is no reason other than that her royal highness has to rest," it was stated at her London residence. The Countess of Harewood, the princess royal, is Mary, the only daughter of King George and Queen Mary of England.

Receive Warm Welcome

Thornton and MacDonald Reach Home After Release From Soviet Prison

London, Eng.—Cheers, flowers and kisses awaited L. C. Thornton and William MacDonald as they arrived here, released by the Soviet authorities from prison where they were serving sentences imposed on conviction of bribery and espionage.

Thousands thronged the station platform to welcome back the men whose freedom was obtained by the British embargo on Russian trade. Thornton's little daughter somehow was passed through the crowd to her daddy's car almost before the train stopped and was immediately in her father's embrace.

Thornton declared he and MacDonald were full of gratitude to the British government and the British people for so staunchly taking action which resulted in their release.

He also expressed gratitude to Sir Edmund Ovey, former British ambassador in Moscow and gratification at the confidence their own company had shown in the accused.

Utters Warning

Says U.S. May Demand West Indies In Payment Of War Debt

London, Eng.—Warning the British West Indies might some day be demanded by the United States in payment of the British war debt, and declaration public opinion should be fully prepared, was uttered Thursday by Archbishop Jullien of St. Vincent, preaching at the annual West Indies service at St. Andrews Church, Queen Victoria Park.

A certain section of politicians in America were already making such a demand, the archbishop said. It was unfortunate, said Archbishop Jullien, that England would ever agree to a demand from the United States for the British West Indies. Nevertheless public opinion should be prepared.

Free State Elections

Dublin Municipal Vote Indicates Swinging Away From De Valera

Dublin, Irish Free State.—Supporters of President Eamon De Valera's Republican Government in the Irish Free State are worried by failure of the forces to gain victory in the Dublin municipal elections.

Results of the election showed the city preponderantly in favor of the Nationalists and independent supporters former President William T. Cosgrave. Besides returning Lord Mayor Alfred Byrne, an independent ally of Mr. Cosgrave, the electors gave seats to 22 Nationalist and independent candidates and only 13 to adherents of the De Valera regime.

The Nationalists hailed the result as indicative of a swing away from the Republican Government.

Ontario Dentists Robbed

Niagara Falls, Ont.—Five dental offices in Hamilton and Niagara Falls were broken into and ransacked for gold leaf, gold, scrap and false teeth by three thieves at Hamilton late last night. At Hamilton they threatened to close to \$400.

CENTRIST PARTY IN GERMANY IS DISSOLVED

Berlin, Germany.—Former Chancellor Heinrich Brüning announced the dissolution of the Catholic Centrist party, last non-Nazi political party in Germany.

A laconic statement issued by him said: "The Centrist party has dissolved itself in agreement with the Chancellor (Hitler)."

The extinction of the Centrist party marks the end of the parliamentary party system in Germany as well as the end of political Catholicism. The Bavarian Populists, allies of the Centrist, quit the political scene. Elsewhere these parties held 50 of 984 seats in the pre-Hitler parliament.

The Volkspartei, or People's party, of the late Chancellor Gustav Stresemann, which had only two Reichstag seats but was formerly much more powerful, also announced its dissolution.

These parties followed the lead of the Nationalists, who had combined with the Nazis in establishing the new regime last January, in voluntarily abandoning. The Nazis themselves had previously outlawed the communists, socialists and stateparties.

BUYING POWER OF WHEAT IS UP FIFTY PER CENT.

Winnipeg, Man.—Purchasing power of wheat in western Canada over "things that farmers buy" today stands at 70 per cent. of the 1913-14 level, compared with 40 per cent. in mid-April and only 22 per cent. on December 16, last year, when wheat fell to 38 cents per bushel in Winnipeg market and touched the lowest point in the history of the grain trade.

These figures are shown in the "farmers' index chart," compiled by the Seagrain Grain Company Limited. Index figures on livestock show cattle with purchasing power of 50 per cent. of the pre-war price; hogs 58 per cent., and lambs 73 per cent.

Prices of wheat used in the compilation of this paid to farmers at elevators in western Canada are No. 1 Northern on the basis of 25 cents per 100 pounds freight, which is 15 cents a bushel.

In the things farmers buy to raise 146 items essential to an average grower in the west to carry on the farm.

There are 16 items of groceries, 37 items of clothing, 29 items of household equipment, 51 items of farm equipment, 11 items of machinery, and two items of municipal taxes in the list.

The compilation notes that the index of things farmers buy is still 127 per cent. of the 1913-14 level.

Tax Compacts

Duty Boosted On Imported Powder Puffs

Ottawa, Ont.—Mildred's aids to beauty are going to cost her more. Because of a decision of the National Revenue board the excise tax on imported compacts and powder puffs from 3 to 10 per cent. More than that, this assessment on the diminutive vanity case is retroactive to March 22, 1933, so that if Miss Canada has not already paid her 10 per cent. on the foreign compact, the importer will be required to do so.

The increased tax applies to compacts, compact cases, or vanity cases, whether or not they contain any toilet preparation, and on powder puffs and powder pads.

Woman Will Supervise Refueling Of Monoplane

Minneapolis Girl To Aid Post At Two Siberian Ports

New York.—Miss Fay Gillis, 23, of Minneapolis, will direct the refueling of Wiley Post's monoplane, "The Winnie of Oshkosh," at two Siberian ports on his projected world solo flight.

Lea Frohenlof, Post's representative, said Miss Gillis had left Moscow on June 25 for Novosibirsk, where the aviator plans to stop after leaving the Soviet Union. She will have a short stay, she will supervise replenishment of the gas tanks and any adjustments the plane needs.

Trade With Russia

British Government To Take Into Account Anglo-Canadian Agreement

London, Eng.—A questioner in the House of Commons was assured by a government spokesman that in trade talks between Britain and Russia, the British government will take into full account Article 21 of the Anglo-Canadian trade agreement.

This provides that where the imperial preferences are endangered by the importation of products sold at an unfair price because of state subsidies or state purchase, such commodities will be prohibited entry.

R.C.M.P. Promotions

Ottawa, Ont.—Two promotions to the rank of acting superintendent were announced from headquarters of the Royal Canadian Mounted Police. Inspector V. A. M. Kemp, adjutant of the force here, and Inspector Herbert Darling, assistant to the director of criminal investigation in Ottawa, receive these appointments as from July 1.

King Opening Big Dock

Southampton, Eng.—The greatest dry dock in the world, built at Southampton for the Southern railway at a cost of \$4,000,000, will be opened by the King July 26. During the ceremony the dock will take 500 tons of earth and mud were excavated from the site and 750,000 tons of concrete were used.

All for a big day--And a Big day for all

Everybody Welcome

Archie Finds Out

Archie Ruggles says he can learn something new everyday. Last week he found out that one cannot sit on a car battery without having to buy a new pair of pants. Ask Archie why he is wearing new overalls these days. If Archie won't tell, maybe Pete Holm can.

Annual U.F.A. Picnic

The annual U.F.A. picnic will be held at the Willow Creek grounds, about 10 miles south-west of Staveland on Wednesday, August 2nd. While there will be several kinds of sports, there will be no admission to the grounds. Water sports late in the afternoon are expected to be especially attractive and interesting. This has always been a popular picnic and the crowd this year promises to be greater than ever.

The Little Bow Constituency of the Alberta Women's Institute Conference will be held in Christ Church, Vulcan, on July 20th. Mrs. Thompson, Coal-dale, District Director and Mrs. Ferguson, Trochu, Provincial President are expected to be present. Sessions commence at 10:00 a.m. and 1:30 p.m.

Members of the choir and their families held a picnic at Willow Creek on Sunday, July 9. The day was ideal and there were games and sports for everyone. A large number sat down at the lunch prepared by the ladies. The day proved so popular, it promises to be an annual event.

Wins Scholarship

On Saturday last a special bus en route to Olds, passed through Champion carrying as passengers boys and girls over eleven years of age, who were the winners of the Short Course Scholarship.

Awarded at last fall's school fairs throughout southern Alberta, Marie Matlock from Harmony S.D., who was winner of the scholarship at Reid Hill school fair last fall boarded the bus here.

Harmony school has been successful in winning a scholarship each of the last three years. In 1930 Wilbur Matlock was winner. In 1931 Marie Lawrence, and last year Marie Matlock, each of whom attended the Short Course the following July.
